SIMPLE OPERATION

Our built-in models offer a selection of control options, depending on which model you choose. Our smart fire models are operated using the e-smart app; a user-friendly platform that allows access to your fire's features through your home Wi-Fi, meaning you can select your desired flame effect or switch on your feature lighting at the touch of a button.

Our e-smart fires are also compatible with Amazon Alexa and Google Home for voice activated control. Our e-series models are controlled through the Evonic e-touch app.

The e-touch connects to your appliance via Bluetooth, giving you the ability to control temperature, brightness and time settings all from your smart phone.

FEATURES

Each Evonic Fires model comes complete with a bespoke fuel bed & log set, chosen specifically by our design team to enhance the aesthetic of your fire.

SCHOTT® GLASS

Our fireplaces utilise the latest SCHOTT® glass to enhance the clarity of your flame effect. SCHOTT® is a market leader in glass production, and their products encompass optical interference properties, allowing up to a 90% reduction in surface reflections on all fires where SCHOTT Conturan Magic® is shown. SCHOTT Clear Float® glass is produced using the float process, resulting in glass that has a perfectly flat and parallel surface which is available on all fires where SCHOTT Clear Float® is displayed.

LED TECHNOLOGY

By using the very latest LED lighting technology, Evonic Fires produce some of the most vibrant and realistic electric fires in the world.

Please note

Evonic Fires prides itself on constant development and innovation. We therefore reserve the right to alter the specification of any Evonic product without formal notice. The images in this brochure are produced using photography and CGI. Although the utmost care has been taken to accurately portray our products, we always advise a viewing in person at an approved Evonic Fires retailer's showroom.

E-SMART

- Brightness adjustment
- Speed adjustment
- Target room temperature display
- Drop-down animation selection
- Turn your feature lighting on or off
- Adjustable temperature gauge

AWARD-WINNING FLAME EFFECT

evoflame® ULTRA HD EFFECT WITH BRIGHTNESS SET TO HIGH

evoflame® ULTRA HD EFFECT WITH BRIGHTNESS SET TO LOW

The background image shows a dark stone fireplace wall. A large, rectangular electric fireplace is mounted on the wall, displaying a glowing fire. Above the fireplace, a framed picture hangs on the wall. The floor is covered with a light-colored, textured carpet. A portion of a dark leather ottoman is visible in the bottom right corner.

WALL HANGING ELECTRIC FIREPLACES

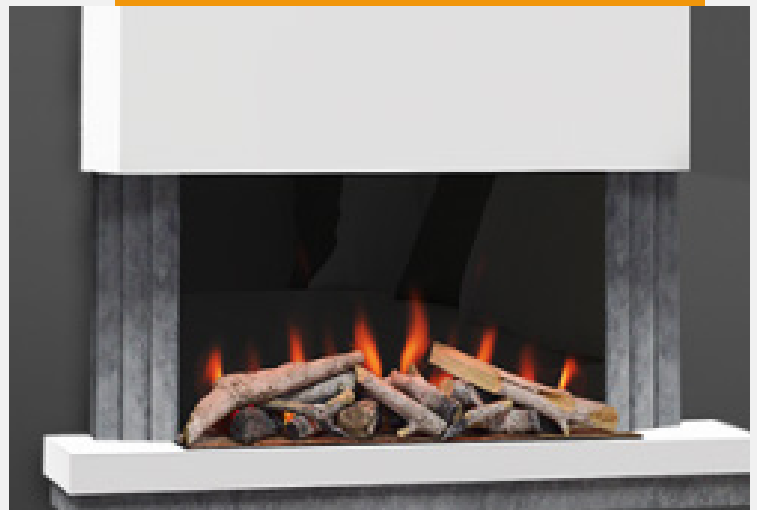

Bergen E-Smart Fireplace

- **Conversion kit to allow modification is available as an extra €100 (1 , 2 or 3 sided conversion)

A modern living room interior featuring a large, textured stone fireplace wall. A long, low-profile white sofa is positioned in the foreground. A dark wood or black media console runs along the base of the stone wall, housing a long, narrow fireplace with a visible fire. Above the console, a dark wood or black shelf holds several white spherical decorative objects. To the right, a small window or glass partition is visible. The overall aesthetic is contemporary and minimalist.
