

Burning Forest // Myca

THE INNOVATION

Real stone, thin & flexible

Innovative real stone veneer consisting of an ultra-thin natural stone layer and a carrier reinforced with glass fibres or cotton.

We have developed a special process to produce many paper-thin slabs from the most beautiful stone blocks in the world.

Each of these slabs is unique and handcrafted in over 12 processing steps.

Despite its lightness, stone veneer retains the feel and look of a solid stone slab.

At the same time, our stone veneer is only approx. 1.5 mm (0.06 in) thin and even flexible!

THE ORIGINAL

Highest quality standards
for over 20 years

MPA NRW.

DIN EN 15102:2011-12
DIN EN 15102:2008+A1:2011

STANDARD SIZES

XXL sizes up to 3.500 mm (137.79 in)

Whether creative laying patterns with small format tiles or virtually seamless design statements with our XXL formats: Design your building project exactly according to your wishes.

If you want to save time and work, you can even order our stone veneers directly in the individual desired size!

Some of our decors are even available in special sizes up to 3.500 mm (137.79 in) in length. Just contact us if necessary, and we will produce your stone veneers directly in special sizes in our factory.

	300 x 600 mm 11.81 x 23.62 in	1.200 x 600 mm 23.62 x 47.24 in	1.220 x 610 mm 24 x 48 in	2.400 x 1.200 mm 47.24 x 94.48 in

SILVER GREY // 2.400 x 1.200 mm (47.24 x 94.48 in)

SIMPLE PROCESSING

4 working steps to success –
without any special tools

1) CUTTING TO SIZE

Cut stone veneer to the right size if necessary. This works by hand or table saw, multitool or laser.

2) PROTECT

Depending on the place of application, apply an impregnation or sealant with a lint-free roller.

3) BONDING

Apply a suitable adhesive to the entire surface of the mounting surface or the back of the material.

4) ATTACHMENT

Position the stone veneer in the desired position and press into place.
DONE, THAT'S ALL!

FREQUENTLY ASKED QUESTIONS – quickly answered.

ARTIFICIAL STONE OR REAL STONE?

The stone veneers have a 100% natural stone surface, it is **not** an artificial stone!

WHICH SUBSTRATES ARE POSSIBLE?

Almost any material is suitable as a substrate, including concrete, sheetrock, wood, metal, tile, plaster, acrylic, etc. The substrate just needs to be smooth, dust-free, clean and dry.

HOW DURABLE IS SLATE-LITE?

Slate is more robust than a conventional rough stone slab. Our stone veneers are also UV-resistant and frost-proof, making them suitable for outdoor use.

DO I NEED TO PROTECT THE STONE SURFACE?

In many areas, no additional protection is necessary. However, in wet areas and kitchens, and when used as flooring, the material should be impregnated or sealed to ensure the best possible protection for the real stone.

WHAT DOES MY STONE SHEET LOOK LIKE?

Each sheet of *Slate* is unique in pattern and texture. However, we take care when ordering to ensure deliveries are as close to batch as possible. With our optional photomatching service, you can also select your desired decor from the available batches before delivery.

BOOKMATCHING-SETS

Design highlights made of several
XXL panels for a brilliant spacial effect

Our bookmatching sets are special: each set contains several *Slate-Lite* large formats in the format 2.400 x 1.200 mm (47.24 x 94.48 in) with mirrored structures for an impressive overall appearance. The 100% natural stone structures are coordinated in such a way that you create a mirror-image matching pattern that can be arranged in different ways!

RUSTIQUE (TL) // Slate

TRANS|LUCENT

Eyecatcher with luminosity

DATA SHEET

Different effects depending on light source ✓

Variable sizes up to 2.800 x 1.200 mm ✓

Suitable for any light source ✓

With our *Translucent* decors, you become a lighting designer thanks to the transparent backing material!

Due to the translucent back, unique light effects can be created with a light source behind the sheet of stone, so that extraordinary backlit objects can be created!

Depending on the type of light, different effects are achieved: you can use cold, warm or even colored light to create your individual stone light object.

100% natural stone surface
Total thickness: approx. 1.5 - 2.5 mm
Weight: approx. 1.5 kg/m²
Substrate: fibreglass

Size accuracy: 1-2 mm
Maximum temperature: 120°C
Bendable radius: approx. 10 scm
